Location: Tiszaladány, Hungary

## **Second exchange:**

Starting date: 8 June 2018

End of the project: 17 June 2018

Location: Ada, Serbia

## **Short description of the program:**

The project's aim is to pass over to young people who are in disadvantageous situation from the point of view of the labour market such knowledge that can help them prosper in life, produce the income needed to their living. Today's economic and social situation both at national and European level makes it necessary to have such knowledge that is forward-looking for both the person and the community, society. Having entrepreneurial skills is quite essential and is an aim to be supported both at national and European Union level. Also researches prove that return of investment put into education to entrepreneurial skills is one of the fastest. It has

quite a positive effect on the development of the dynamism of the economies. And beside this, young people having the right entrepreneurial skills are more proactive both at community and social level, are more creative, also their adaptability is more developed, thereby they are more open, their problem solving ability is more developed. Young people having more developed entrepreneurial skills can find a job much easier and also stand their ground as employees better. And they start and enterprise earlier too. But young people don't learn these skills at school. That's why we stand for implementing the design of such a project that develops the young people in complex way, helps their self-advocacy ability, their start on the way of their prosperity that can be either an own enterprise or being an employee too. We want to

help them realize their dreams, desires. And they should do all this by having positive effect onto their environment too. In favour of this we want to organize a double youth exchange with the participation of 4 countries (Hungary, Serbia, Macedonia, Romania). The first exchange will be implemented in Tiszaladány, the second one in Ada, Serbia. 8 disadvantaged young people from each implementing country will participate, altogether 32. We plan both exchanges for 10 days and our aim is the development of entrepreneurial learning and entrepreneurial skills in favour of handling the youth unemployment. By the methods we bring to the fore the non-formal pedagogical education:

Participants should prepare for the exchange at home. The facilitator will contact the contact persons at each partner organization and write the tasks participants should prepare with.

Participants should bring towel and the necessary things for the national evening (food, drink, etc.)

**It is important that the same participants should take part in both exchanges!!!!!!**

Our NGO will send a minibus for the participants.

The detailed agenda is sent attached.
